

**CWS Stormwater Workshop Series**  
**April 10 Workshop: Ecosystem Impacts & Approaches**  
**Speaker Biographies**

**Laurie Fowler** is the director of Public Service and Outreach for UGA's Odum School of Ecology. As an environmental and land-use attorney, she serves on the faculty of both the Odum School of Ecology and the School of Law. Her research interests include federal, state, and local environmental protection laws and policies; watershed protection strategies; growth management and open space preservation; land use planning; conservation easements; environmental justice; citizen participation; and service learning.

**Dave Drullinger** is an Environmental Quality Analyst with the DEQ Water Bureau in Lansing, where he has worked since 1990. His main focus has been developing NPDES storm water general permits and providing direction to the municipal storm water permit program. Dave began working for the Water Bureau's Non Point Source Unit in January, 2008. Since that time he has administered development of the Low Impact Development Manual for Michigan and is contributing to Wet Weather Workgroups for urban land uses and for waste discharges to land in rural areas.
